

Booki Choi

Aspiring Business Analyst · Frontend Engineering & Data Analytics Background

Burnaby, BC, Canada

bookichoi98@gmail.com | [linkedin.com/in/bookichoi](https://www.linkedin.com/in/bookichoi) | github.com/BookiChoi | bookichoi.github.io

Frontend Engineer with 3.5 years of experience shipping production web products at a B2B2C startup, now transitioning into Business Analysis through a Data Analytics diploma in Vancouver. Combines a hands-on engineering background with growing data and business analysis skills to bridge technical execution and product decision-making.

EXPERIENCE

Onmydev

Jul 2022 – Dec 2025

Frontend Engineer · Seongnam, South Korea

- Joined as an early engineer and independently built ~90% of the merchant admin dashboard (product, review, comment, and loyalty-point management); proposed and led the adoption of TanStack Query to replace manual-refresh-dependent state with optimistic updates, earning direct customer feedback that the tool had become "much easier to use."
- Built a Chrome-extension-based tool to import Instagram reviews that the backend couldn't access directly; adopted 120+ times/week with zero support tickets and positive customer feedback.
- Diagnosed a rendering bottleneck in the review widget and rebuilt it with a custom slider and windowing technique, improving render performance by ~60% (initial load time 2s → 0.8s) and eliminating all speed-related customer complaints.
- Built an IndexedDB caching layer to eliminate redundant API calls across multiple widgets loaded on the same page, improving average widget load time by ~70%.

PERSONAL PROJECTS

Taleartnt

Archived

Solo Frontend Developer · github.com/Taleartnt/Front-Taleartnt

- Designed and built a talent-exchange platform end-to-end as the sole frontend engineer on a small team — Feature-Sliced architecture, memory access token + HttpOnly refresh cookie authentication, WebSocket-based real-time chat, AWS (S3/CloudFront) deployment, GitHub Actions CI/CD, and bundle-splitting optimization.

BA Learning Portfolio

In Progress

github.com/BookiChoi/BA-Portfolio

- Ongoing self-directed portfolio building foundations in SQL, Python, EDA, Tableau, and business case analysis through a "Learn → Practice → Build" approach.

EDUCATION

Cornerstone International Community College of Canada (CICCC)

Jan 2026 – Present

Data Science Diploma (In Progress) · Vancouver, BC

Suwon University

2017 – Feb 2023

B.S. in Information Security · South Korea

SKILLS

Data & Business Analysis

SQL, Python (Pandas, NumPy), Tableau, Statistics, EDA & Data Cleaning, Hypothesis-Driven Analysis, Business Case Analysis

Engineering

React, TypeScript, JavaScript, SCSS, State Management (TanStack Query, Recoil, Jotai), Jest, Storybook, Performance Optimization
